

Goal Ia5 – Condition of Historic Structures

NPS Mission Goal. By September 30, 2005, 50% (12,113 of 24,225) of the historic structures listed on the 1999 List of Classified Structures are in good condition.

Park Long-term Goal. By September 30, 2005, 55 (59%) of the park's 93 historic structures on the List of Classified Structures, as of the end of FY1999, are in good condition.

Park Annual Goal. By September 30, 2003, 51 (55%) of the park's 93 historic structures on the List of Classified Structures, as of the end of FY 1999, are in good condition.

Miscellaneous Notes. The List of Classified Structures (LCS) contains those structures that have been identified as having certified or potential historic significance. The park's LCS contains residences, ranger stations, bridges, cabins, the Generals Highway, highway bridges, and much more. The purpose of the list, last updated in 1999, is to provide information to park managers regarding those structures that need to receive special attention because of their historic significance. The LCS is developed and maintained by the Cultural Resources Office (in the Division of Interpretation and Cultural Resources Management). Physical preservation falls under the responsibility of the Division of Maintenance.

The purpose of this goal is to increase the number of historic structures that are listed as being in good condition. The 1999 LCS for SEKI lists 93; of these, 37 (39%) were rated in good condition.

Tracker. This goal will be tracked by the park archeologist.

Goal Verification/Validation. includes restoration of selected historic structures, maintenance of existing structures, and additions to the LCS.

Goal Ia6 – Meet Standards for Museum Collections

NPS Mission Goal. By September 30, 2005, 73.4% of preservation and protection standards for park museum collections are met.

Park Long-term Goal. By September 30, 2005, 337 of 420 (80%) applicable preservation and protection standards for park museum collections are met.

Park Annual Goal. By September 30, 2003, 322 (78%) of 420 applicable preservation and protection standards for park museum collections are met.

Miscellaneous Notes. The SEKI museum collections include archeological artifacts, historic artifacts, archival collections, and biological, paleontological, and geological objects. The environmental, security, and fire-protection conditions necessary to preserve and protect museum objects are identified in the NPS Checklist for Preservation and Protection of Museum Collections. The Checklist is applied annually to the parks' collections to produce a yearly score.

Tracker. This goal will be tracked by the park archeologist.

Goal Verification/Validation. is available through the NPS Checklist.
